My concerns regarding proposed changes in electoral boundaries are as follows:

- In Wexford four electoral area have historically worked very effectively.
- Any changes to boundaries would gravely impact the electorate and the significance to the Municipal districts.
- It would reduce the number of elected representatives in the areas and a huge increase in the work load of already overworked Councillors.
- Changes would have a detrimental impact on Independent Councillors insofar as they would be moving into new areas or districts with the support of a party and party colleagues.

In Wexford the present system is acceptable and effective and if it's not broken why fix it. I understand that some areas require changes but not Wexford. Therefore I urge that no boundary changes be made to the Wexford districts.

Regards

Cllr Mary Farrell
Gorey Municipal District.
